

Hotel Website AI Audit

Enter a hotel website. It crawls the key pages, checks them against a fixed AI-visibility checklist, scores the site, and tells you exactly what to add.

70/100

AI VISIBILITY SCORE

A solid base with clear gaps

Technical & crawlability · 20%	100
Hotel content completeness · 30%	75
AI answer readiness · 25%	52
Schema & trust signals · 15%	45
Conversion clarity · 10%	75

WHAT TO FIX

Recommendations, in priority order

CRITICAL AI READINESS

Add an FAQ section with FAQPage schema

FAQ content is the format AI most directly quotes when answering guest questions.

- Parking, check-in/out, breakfast, pets, cancellation
- Couples, family and business suitability
- Wrap in FAQPage schema

HIGH CONTENT

Answer parking clearly

Parking is one of the most common hotel questions AI is asked and the site doesn't answer it.

- Whether parking is available
- Price and reservation rules
- Valet, EV charging, height limit
- Nearby alternatives

HIGH CONTENT

State check-in and check-out times

A top-asked factual question AI currently can't answer from the site.

- Check-in time
- Check-out time
- Early check-in / late check-out options

HIGH AI READINESS

Create couples / honeymoon content

This hotel has the ingredients for romantic searches ("romantic hotel Geneva", "honeymoon Geneva") but never assembles them into an answer AI can quote.

- A dedicated section or FAQ "Is [hotel] good for couples?"
- Name the suites, dining and spa that support it
- Target the romantic search phrasing

MEDIUM SCHEMA

Add HotelRoom schema

Room pages exist but aren't marked up, so AI extracts them weakly.

- HotelRoom type per room
- bed, occupancy, image

MEDIUM SCHEMA

Add AggregateRating / Review schema

Rating signals build AI trust and are missing.

- aggregateRating with reviewCount
- A few Review items

MEDIUM CONTENT

Add accessibility information

A growing AI search category the site is silent on.

- Step-free access
- Accessible rooms
- Lift access

MEDIUM CONVERSION

State why to book direct

Gives AI a reason to send guests to the official site over OTAs.

- Best-rate guarantee
- Direct-only perks
- No booking fees

Technical

- ✓ AI & search crawlers allowed (robots.txt) — All major bots allowed
- ✓ Homepage links to key pages
- ✓ Page titles & descriptions present

Content

✓ Room types described

✓ Amenities explained

✗ Parking answered

✓ Breakfast answered

✗ Check-in / check-out times

✓ Pet policy

✗ Accessibility

✓ Airport transfer / distance

✓ Location & nearby attractions

✓ Languages spoken

✓ Cancellation policy

AI readiness

✗ FAQ content on site

✗ Couples / honeymoon content

✓ Family content

✓ Business / meetings content

Schema

✓ Hotel schema

✗ FAQ schema

✗ Room schema

✓ Breadcrumb schema

✗ Rating / review schema

Conversion

✓ Clear booking CTA

✗ Direct-booking benefit stated
